

INTERVIEW JUNE 16, 2005  
AGENDA

- TASER International products overview
  - TASER cartridge (pat. filed 1995)
  - Advanced TASER<sup>1</sup> M26 (pat. filed 1999)
  - TASER X26 (pats. filed 2003)
- Filing status is not CIP; no new matter was added; only claims were amended
  - 09/398,388 filed 9/17/99
  - 10/016,082 Continuation of 09/398,388 (spec. was amended as to format)
  - 10/673,901 Filed as CIP of 10/016,082 (filed with amended spec. of '082)
- Rejection of drawing as not showing element of claim (Office Action in parent 10/016,082 mailed 12/9/2002)
  - (New) FIG. 5 shows output transformer coupled to resistor. Support in grand parent 09/398,388 page 5 lines 16-17.
- What does energy per pulse mean in the prior art?
  - Jack Cover's circuit and energy stored per pulse
  - Typical circuit values recognized by persons of ordinary skill
  - Jaycor Report -- measurement problems and assumptions
  - claims involving measurement criteria (FIG. 5?)
- What does pulse width mean in the prior art?
  - Underdamped resonant circuit waveform
  - Overdamped circuit waveform
  - claims to pulse width and something else
  - claims involving measurement criteria (declaration by expert?)
- Claims on file
